

introducing complete
surface protection against
graffiti and vandalism.

mepfilms | by LLumar
the world's most advanced window films

the simple solution to graffiti and vandalism.

Graffiti can cost building owners, transport companies and tenants many thousands of dollars in annual clean up and repair costs.

Not to mention the loss of visual appeal in premises, vehicles and facilities that is of such important commercial value. The accepted strategy against such damage is to clean off the graffiti as soon as possible, which helps discourage the ‘artists’ from further attacks.

A removable and replaceable barrier

Here’s how Cover Up Anti-Graffiti Film works. This sacrificial film has a special mounting adhesive which allows it to be easily removed and replaced. This avoids the high cost of glass replacement or the clean up and repair of glazed and other non-porous surfaces. It also helps ‘manage’ unintentional damage and normal wear and tear. On glass, in many cases, it can even help cover up existing scratches, making them less visible. Some deeper scratches may be required to be polished out before application of Cover Up Anti-Graffiti Film.

high clarity and low distortion

One of the reasons Cover Up Anti-Graffiti Film works so well is that it is virtually invisible to the naked eye. It has such excellent transparent qualities vandals don’t know it’s there. And its scratch resistant coating simply adds to the deception. Apart from its optical clarity which provides for natural light transmission Cover Up Anti-Graffiti Film also allows distortion-free viewing. Cover Up should be an important consideration in retail as well as many other applications.

Now there is a quick and easy way to do this with MEP Films by LLumar.’ Cover Up Anti-Graffiti Film.

Cover Up is a crystal clear polyester film with adhesive on one side and a tough patented scratch-resistant coating on the other. It can be applied to all glazed surfaces inside or out and many other smooth non-porous surfaces to provide an effective barrier against damage. The film acts as a sacrificial layer between the vandal and your property.

How does it work?

This is a sacrificial film which means once applied it takes the damage, whether it’s a scratch, scrape or difficult to remove paint. The damaged film can then be easily removed and replaced saving the replacement cost of the glass.

applications

Cover Up Anti-Graffiti Film has many applications and is suitable for:

- » exterior and interior glazing
- » any smooth non-porous surface such as glass, marble, stainless steel

Here’s where it can be used:

- » windows, retail store fronts, display windows, mirrors
- » stainless steel balustrades, lifts and escalators
- » transport applications
- » marble, polished concrete and building facades
- » malls, stairwells, bus shelters
- » counter tops and advertising displays
- » Alucabond

damage prevention

Cover Up Anti-Graffiti Film is effective in minimizing or eliminating the damage caused by:

- » spray paints and markers
- » scratching or gouging
- » chemical etching
- » normal wear and tear

Cover Up blocks up to 99% UV rays, helping protect furniture, fittings and stock from fading.

Our other range of films include:

Energy Control Films.

Through glass, up to 79% of solar energy is blocked from entering the home or office, and up to 30% of heat loss prevented in winter. And applying MEP Films to windows can dramatically reduce energy expenditure caused by heat gain (or heat loss) through the glass. These films will also block out 99% of harmful UV rays and reduce glare by up to 93%.

Magnum Safety and Security Films.

These films are designed to prevent glass from shattering or to safely contain the glass shards in the event of breakage. Available in clear or tinted.

Decorative and Designer Films.

An innovative and flexible art medium used by architects, interior designers and fit-out consultants to achieve stunning visual effects. Very adaptable as an innovative medium to bring a creative edge to the home or office. Ask us for help with design.

Night Series Films.

The remarkable Night Series retrofit film is designed to cut down internal reflection both day and night plus delivering an uninterrupted nonreflective outlook just like clear glass.

Automotive Films.

Your car will be cool and comfortable on the inside and look great on the outside. There’s a film to suit whatever look and comfort level you need. And for added security there’s Magnum Security Film. Designed to protect you and your car, wherever you are.

why choose MEP Films by LLumar?

MEP Films by LLumar are the specialists when it comes to window film solutions, with world class products, the financial strength, experience and technical expertise to manage and implement projects of any size, anywhere in the world.

Our profile and capabilities:
